## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, and 7-13 are rejected under 35 U.S.C. 103 (a) as being anticipated by Komune (Japan Pat. 60-178208) in view of Gordon (newly cited).

Komune discloses the invention substantially as claimed. In particular, Komune shows in Fig. 2 a jet burner for gaseous fuels comprising at least two different surface areas (3,4) wherein first surface areas (3) provided on an infrared rays radiation mass are permeable for the fuel, whereas second surface areas (4) provided on a ceramic plate are impermeable for the fuel.

However, Komune does not disclose that the infrared rays radiation mass is formed of ceramic foam.

Gordon discloses in col. 2, lines 1-3 and col. 2, lines 27-54 that it is common knowledge to employ ceramic foam in an atmospheric burner for the purpose thoroughly mixing of air-fuel mixtures so that the flame can provide complete combustion, thus reducing emissions.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the infrared rays radiation mass of Komune from ceramic foam such

as taught by Gordon in order to provide complete combustion of the air-fuel mixtures, thus reducing emissions.
